**DETAILED ACTION*****Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a method of kinase inhibition profiling.

Group II, claim(s) 6-12, and 31, drawn to a method of and the first method of use directed to analyzing intra-pathway kinase inhibition of a pharmaceutically active compound.

Group III, claim(s) 13-26 and 31, drawn to a method of analyzing an inter-pathway kinase inhibition of a pharmaceutically active compound and a high throughput screening system for analyzing inter-pathway kinase inhibition of a pharmaceutically active compound.

Group IV, claim(s) 27-30, drawn to method of data processing.

Formatted: Line spacing: Double

**Comment [JSB1]:** note that some claims are drawn to an apparatus that executes the process. Would be nice to make the entire action double spaced.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions of Groups I-IV each has a different special technical feature not shared by the remaining groups. For example, group I has the special technical feature of a method of kinase inhibition profiling that is not shared by any of the remaining groups. Group II has the special technical feature of analyzing intra-pathway kinase inhibition of a pharmaceutically active compound that is not shared by any of the remaining groups. Group III has the special technical feature of a high throughput screening system that is not shared by any of the remaining groups. Group IV has the special technical feature of a method of data processing that is not shared by any of the remaining groups.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1631

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

**Comment [J5B2]:** I don't think Ochiai rejoinder applies here since you have not restricted between a product and a process, you have three process groups, one of which includes apparatus claims. So delete this form paragraph.

**Deleted:** The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a non-elected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

**Deleted:** In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.¶
